3. ADVANCED

3.1. CUSTOMIZING THE TIMER

3.1.1. OVERALL SETTINGS

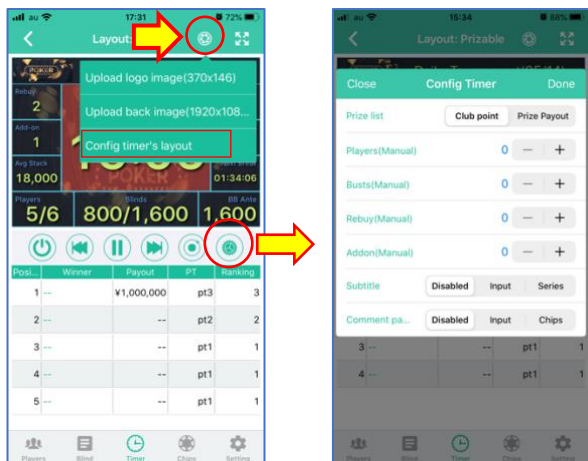

In club settings, you can set the default timer appearance.

1. Upload logo image
2. Upload background image
3. Modify colors
4. Choose voice
5. Select layout (whether to display the prize pool)

3.1.2. INDIVIDUAL AND MORE SETTINGS

During events, use the button  to individually edit the timer appearance.

Additionally, use the button  to adjust the content displayed on the timer.

 Editing contents are the same as the overall settings

 Editing the display contents on the Timer

1. Prize pool content (club point or prize payout)
2. Manual adjustment of various counts
3. Title display
4. Contents displayed at the bottom

Note:

Overall settings and individual settings are independent and do not overwrite each other.

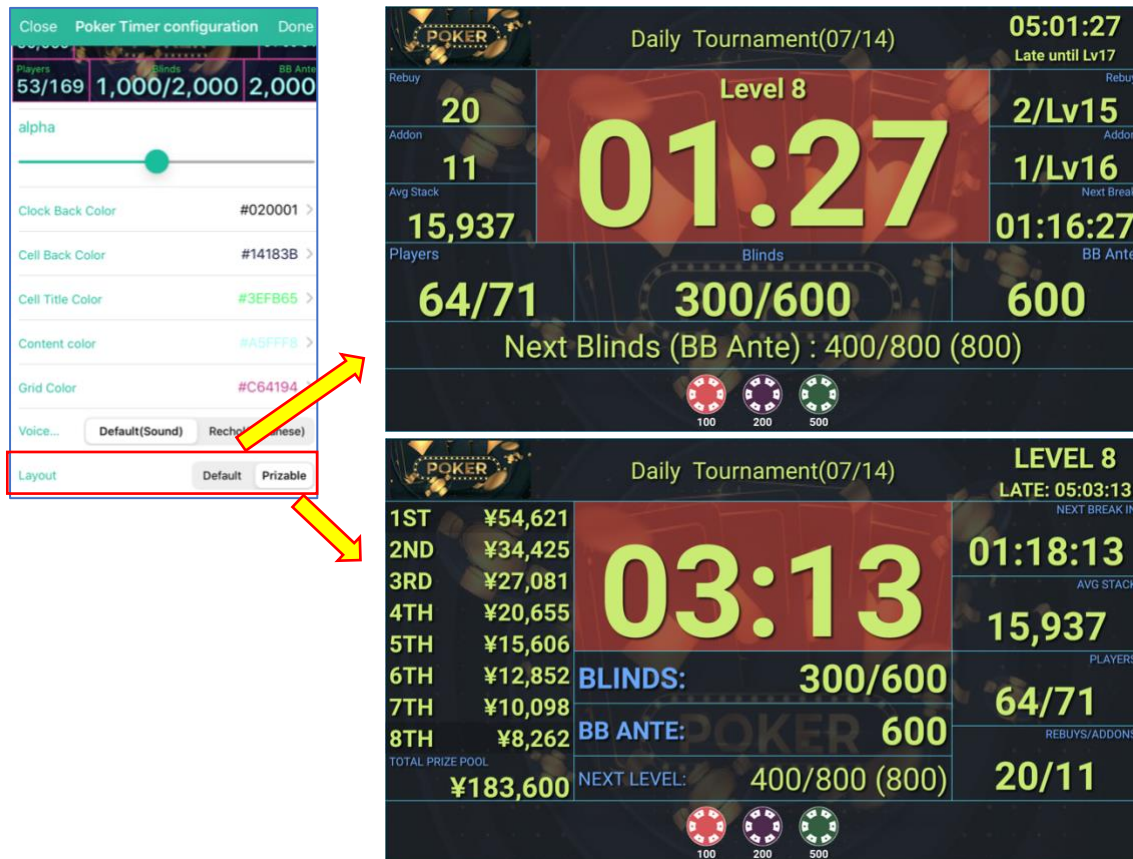

The system will prioritize the timer appearance set in individual settings. Individual settings apply to all events in the series.

3.2. DISPLAYING PRIZE POOL

Currently this feature is only available on Fire TV and Android TV. It is still under development for iPhone/iPad and Apple TV.

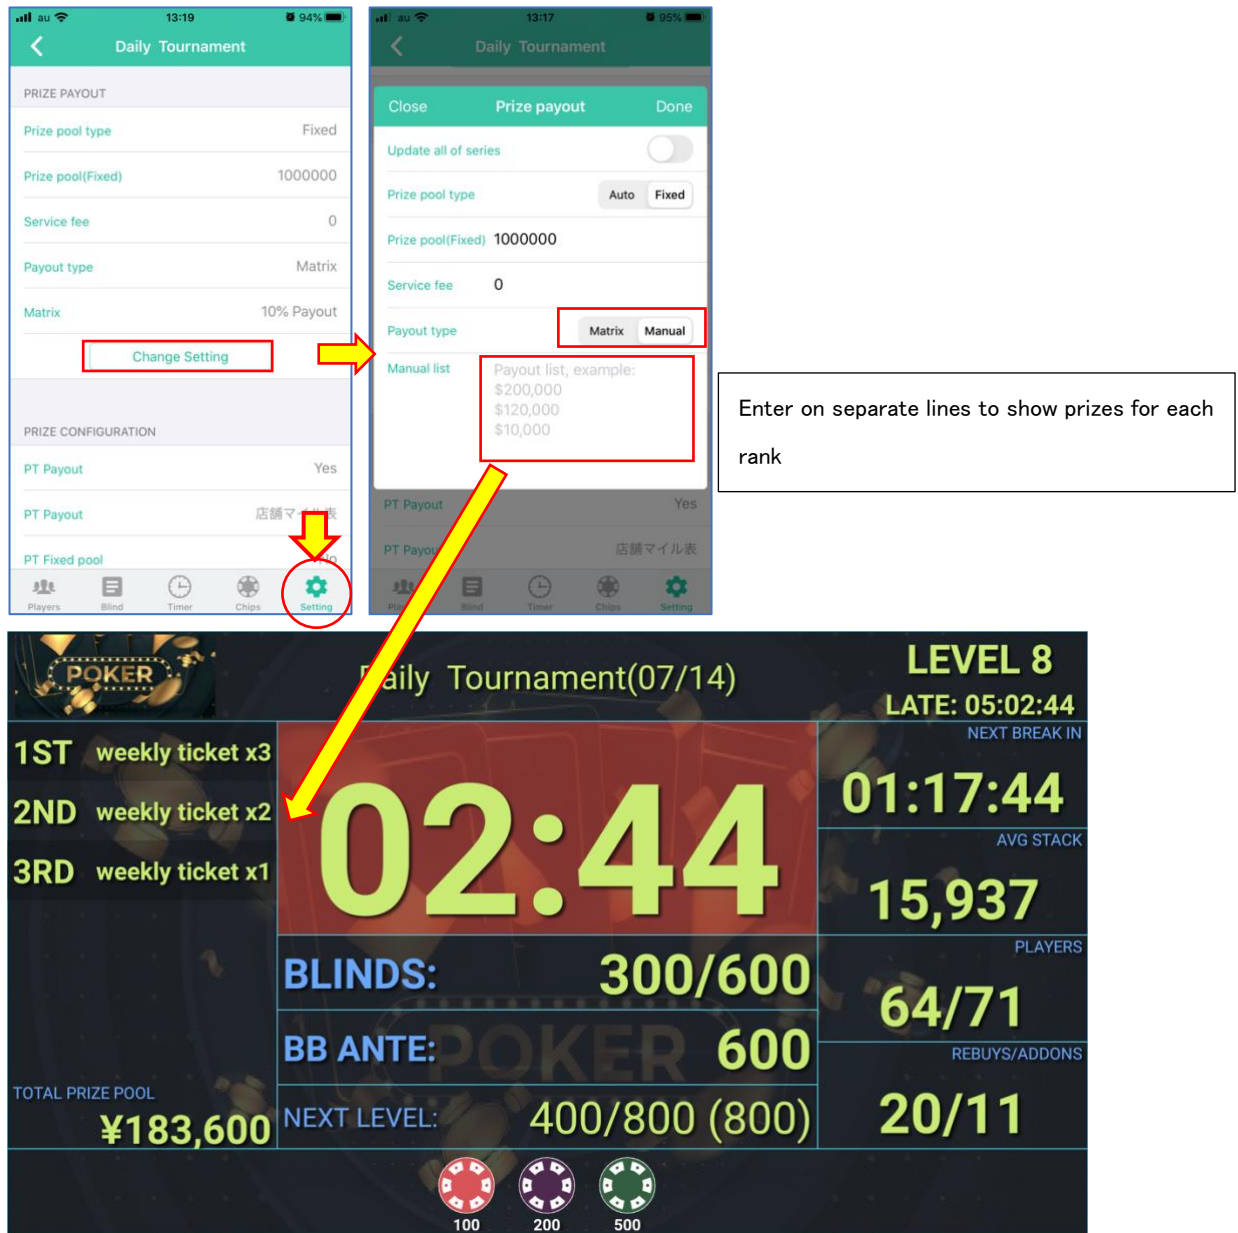

3.2.1. SWITCHING APPEARANCE

In the Timer appearance settings, you can switch the layout.

3.2.2. MANUAL INPUT

For non-cash prize pools, you can display content by manually entering text.

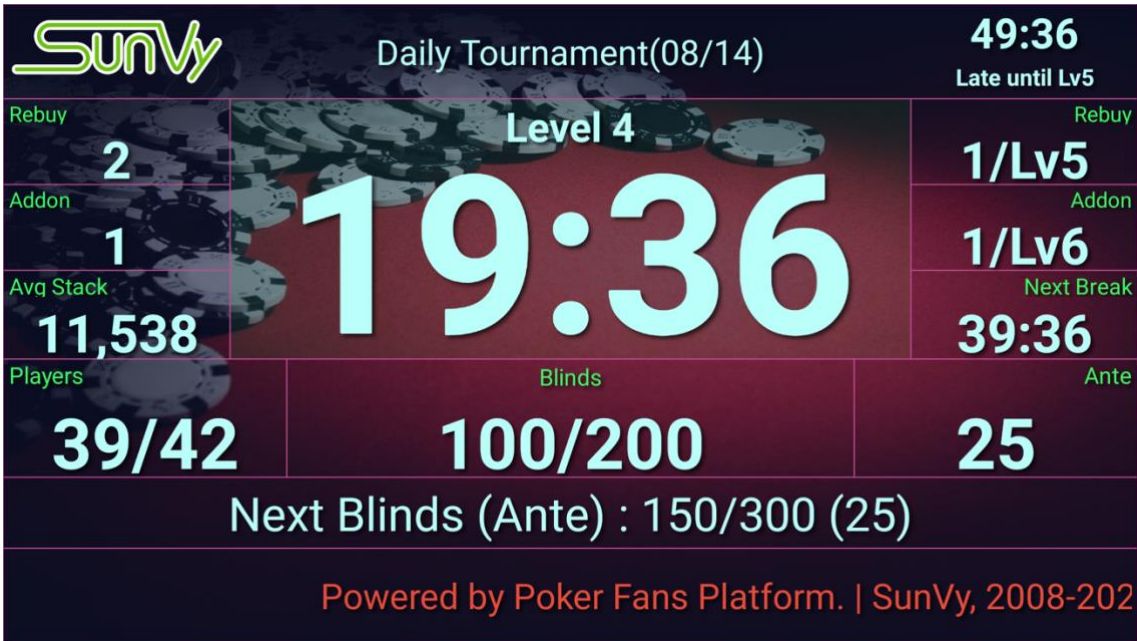

3.1.3. DISPLAYING NEWS AT THE BOTTOM OF THE SCREEN

By manually entering text in “Comment pannel” via the  on the timer screen, you can display comments at the bottom of the timer screen on the TV.

- Short texts are displayed as they are.
- Long texts will scroll horizontally across the screen.
- If you add a line break, the previous text will be replaced with the next one.

Additionally, you can change the comment color. Open “Config timer layout” via the  on the timer screen. Edit the “Comment Color” section.

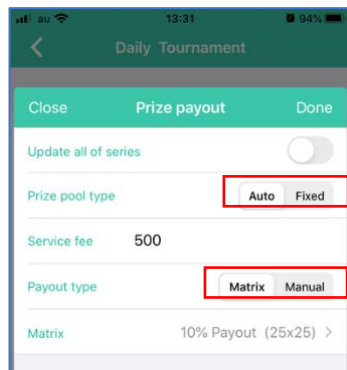

The screenshot displays the SunVy poker timer interface. At the top, it shows the SunVy logo, the tournament name "Daily Tournament(08/14)", and a timer set to 49:36 with the note "Late until Lv5". The central display features a large timer at 19:36 and the text "Level 4". On the left, player statistics are shown: Rebuy (2), Addon (1), Avg Stack (11,538), and Players (39/42). On the right, more statistics are listed: Rebuy (1/Lv5), Addon (1/Lv6), Next Break (39:36), and Ante (25). The bottom section displays "Blinds" as 100/200 and "Next Blinds (Ante) : 150/300 (25)". The footer states "Powered by Poker Fans Platform. | SunVy, 2008-2021".

By default, official news is displayed. If you want to hide it, set “Show Comment” to “Disabled” or “Chips”.

If you are using a Business Course or higher, manually entered text will be given priority, and official news will be hidden.

3.2.3. AUTOMATIC CALCULATION

Using the payout table, the system will automatically calculate the prize and display it on the Timer.

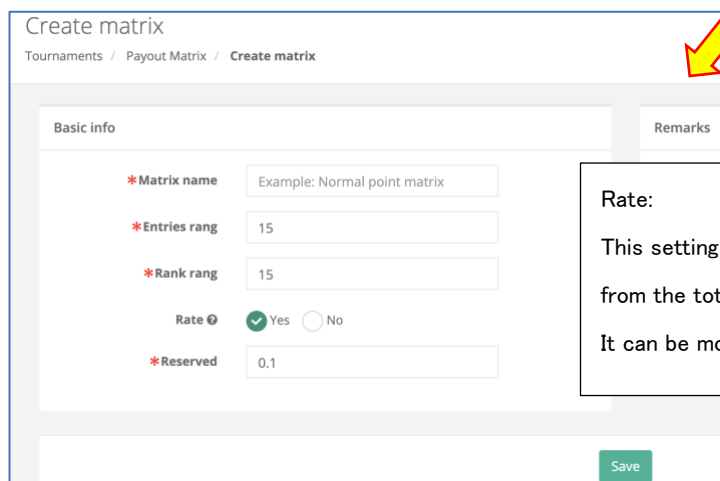

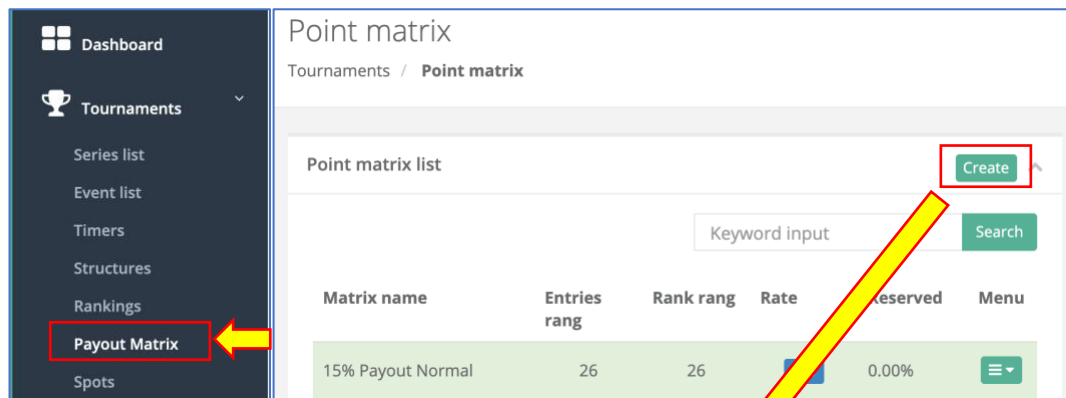

1. Auto
Prize Amount = (Buy-in - Service Fee) × Number of Participants × (1 - Admin Rate (3%))
2. Fixed
Enter a fixed value as the total prize pool

Set the payout type to "Matrix"

a. Create Payout Matrix (web only)

Log in to the Poker Club web system (<https://club.sunvy.jp/>), and find "Payout Matrix " under "Tournaments".

Rate:

This setting determines whether to remove the reserved portion from the total prize amount before distributing it to players.

It can be modified any time after saving.

b. Edit Payout Matrix (web only)

After creating, open the menu and select "View matrix" for more detailed editing.
